## CHAIRMAN'S STATEMENT

I am delighted to present the 2009 Wild Salmon and Sea Trout Fisheries Statistics Report. This annual report maps trends in the stocks of salmon and sea trout since 2001 from both the commercial and recreational fisheries sectors. This report provides valuable information to fisheries' managers, scientists, policy makers and legislators and assists in the design and implementation of policies and strategies for the conservation of salmon and sea trout stocks in Ireland. The 2009 statistics show that the total number of salmon harvested by all methods was 24,278 - which represent a decrease of $22 \%$ on the total harvest recorded in 2008. 2009 proved a difficult year for both anglers and commercial fishermen with the deterioration in catches due to unfavourable fishing conditions, high water levels, marine survival rates and some late fish runs at key fishing periods.

The 2009 commercial catch was 6,757 salmon and 45 sea trout (over 40 cm ) which was only $37 \%$ of the Total Allowable Catch (TAC) allocated to the sector. The biggest landings of salmon were in County Kerry on the River Laune with $24 \%$ of the commercial catch, in County Limerick on the River Feale with $18.5 \%$ of the commercial catch; and in County Cork on the River Lee with $17.5 \%$ of the commercial catch.

The salmon angling harvest was 17,521 in 2009 which was only $31 \%$ of the TAC allocated to the sector, with an additional 11,422 salmon caught and released. Thus, of the 28,943 salmon caught, approximately $40 \%$ of the total catch was subsequently released. Although anglers and commercial fishermen experienced some difficult fishing periods, fish counter information reported good numbers of salmon moving up rivers during the main runs. For the 2009 season, 72 rivers (including catch and release options) were open or partially open for fishing with 79 rivers completely closed in 2009. "2009 again witnessed a shift in the share of the harvest as between that of the recreational anglers and the commercial fishermen with commercial fishing accounting for $28 \%$ of the catch in 2009 ( $29 \%$ in 2008) and angling $72 \%$ ( $71 \%$ in 2008)"

These statistics assist in generating important marketing information, by providing an insight into annual angling trends, helping to form the basis of marketing strategies and develop new angling initiatives. 18,314 salmon rod licences were sold to anglers from forty six different countries. Naturally the majority of licence sales (66\%) were to residents within Ireland, 11\% to Northern Ireland and a further $10 \%$ of angling licence sales to UK residents with a significant number of anglers also coming from France and Germany. 2009 was a very difficult year for all sectors of the economy and this was reflected by a decrease of $8.7 \%$ in rod licence sales compared with 2008.

I would like to commend the management and staff of the Central Fisheries Board, the Regional Fisheries Boards, the Standing Scientific Committee and all stakeholders in the sector for their tremendous and dedicated work in making the Wild Salmon and Sea Trout Tagging Scheme such a great success and for ensuring that the significant changes in the sector introduced in 2007 continue to be implemented in an effective and efficient manner.

David Mackey
Chairman
Central Fisheries Board
March 2010

## THE CENTRAL AND REGIONAL FISHERIES BOARDS

## Mission Statement

To ensure that the valuable natural resources of inland fisheries and sea angling are conserved, managed, developed and promoted in their own right and to support sustainable economic activity, recreational amenity and job creation.

## About the Fisheries Boards

The Fisheries Boards are the statutory agencies responsible for inland fisheries in Ireland and operate under the aegis of the Department of Communications, Energy and Natural Resources.

The principal functions of the Central Fisheries Board are to:

- advise the Minister for Communications, Energy and Natural Resources on policy relating to the conservation, protection, management, development and improvement of inland fisheries;
- support, co-ordinate and provide specialist support services to the seven Regional Fisheries Boards; and,
- advise the Minister on the performance by Regional Fisheries Boards of their functions.

The seven Regional Fisheries Boards have responsibility for conservation, protection, development, management and promotion of inland fisheries in their regions. They have a duty to co-ordinate and co-operate in the delivery of a national fisheries service, observing principles of sustainability, biodiversity and the conservation of all species in inland water ecosystems.

Each Fisheries Region is divided up into one or more fishery districts, of which there are 17 in total. Commercial salmon fishermen are licensed to fish a particular fishery district. Angling licenses are valid to fish all regions or a particular fishery district in where rivers are open for fishing, depending on the type of license purchased.

## INTRODUCTION

The Wild Salmon and Sea Trout Tagging Scheme commenced for both commercial and recreational salmon fishing licence holders on 1st January 2001, having been provided for in the Fisheries (Amendment) Act, 1999 (No. 35 of 1999). This was followed by the introduction of Total Allowable Catches (TAC) for the commercial salmon fishing sector and bag limits for recreational anglers in 2002. The Report of the Standing Scientific Committee of the National Salmon Commission was presented to the Minister for the 2006 season outlining the scientific catch advice for the forthcoming season and the requirements to meet international obligations. Following consultation with the Central and Regional Fisheries Boards and the Standing Scientific Committee, the Minister set the total allowable harvest on an annual basis from 2007 onwards for each of the rivers which exceed the Conservation Limit.

The principal aims of the Wild Salmon and Sea Trout Tagging Scheme are to provide a means of collecting accurate nominal catch statistics and estimates of salmon and sea trout stock exploitation, to develop best management strategies and to ensure these species are exploited in a manner consistent with their long-term sustainability on a national, regional, fishery district and river basis.

Under the regulations all fishermen must affix a coded tag to each salmon (or sea trout over 40 cm ) they catch and retain. A logbook entry must then be made giving the details of the fish caught. All logbooks and unused tags must be returned to the Regional Fisheries Boards within a period of 7 days after the last day of the relevant fishing season, or after the licence has been in force, as set out in the Wild Salmon and Sea Trout Tagging Scheme regulations (The relevant S.I. in place for the 2009 commercial and angling seasons was S.I. No. 586 of 2008). 2009 saw the continuation of a system of brown gill tags to be used in association with blue gill tags for the tagging of wild salmon and sea trout in certain listed rivers which had a low surplus for harvesting.

The data contained in this report is taken from salmon licences and logbook data supplied by commercial and recreational fishermen. This data is entered by the Regional Fisheries Boards staff into databases and following this the validation, collation and analysis of the data is performed at the Central Fisheries Board and the final statistics report is produced.

For 2009, there was an annual bag limit of 10 fish per angler of salmon (any size) or sea trout (over 40 cm ). Subject to the annual bag limits an angler could take: 1 salmon (any size) or sea trout (over 40 cm ) per day until May 11th, with a max of three fish in total for this period; 3 salmon (any size) or sea trout (over 40 cm ) per day from 12th May until the end of August; 1 salmon (any size) or sea trout (over 40 cm ) per day from the 1 st of September to the end of the season on open rivers. After the daily bag limit had been taken, angers were permitted to fish catch and release, using single barbless hooks and there was a ban on the use of worms.

## Chapter 1

Summary Commercial and Angling
Catch Statistics
2001-2009

Table 1 - Total Salmon Catch 2001-2009

| Year | Drift | Draft | Other <br> Engine | Adjusted Angling <br> Harvest | Total Harvest | \% change on <br> previous year |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2001 | 197,172 | 30,861 | 5,368 | 26,074 | 259,475 |  |
| 2002 | 179,177 | 23,032 | 4,690 | 29,408 | 236,307 | $-8.9 \%$ |
| 2003 | 141,222 | 21,100 | 4,552 | 20,888 | 187,762 | $-20.5 \%$ |
| 2004 | 120,303 | 19,443 | 3,860 | 26,202 | 169,808 | $-9.6 \%$ |
| 2005 | 101,231 | 16,735 | 3,214 | 22,361 | 143,541 | $-15.5 \%$ |
| 2006 | 70,105 | 13,398 | 2,673 | 22,485 | 108,661 | $-24.3 \%$ |
| 2007 | N/A | 8,843 | N/A | 19,430 | 28,273 | $-73.98 \%$ |
| 2008 | N/A | 8,903 | N/A | 22,215 | 31,118 | $+10.06 \%$ |
| 2009 | N/A | 6,178 | 579 | 17,521 | 24,278 | $-21.98 \%$ |

Table 1 shows the summary statistics for salmon harvest for all engines including rod and line for 2001-2009. Angling figures shown represent the adjusted salmon harvest. Also presented are the percentage change on previous years.

In 2001, the total harvest of salmon by all engines was 259,475. By 2009, this had fallen to 24,278 (Table 12). This represents a decrease of $c .90 .64 \%$ between 2001 and 2009.

Fig. 1 Total salmon harvest by all engines 2001-2009.

For 2009, anglers took $72.17 \%$ of salmon, draft nets account for $25.45 \%$ of salmon and other engines (snap nets) accounted for $2.38 \%$ (Table 12).
$20.8 \%$ of the 2009 total salmon harvest was taken on the River Moy, $11.6 \%$ on the Blackwater (Munster), $10.4 \%$ on the River Laune, $9.2 \%$ on the River Feale and $6 \%$ on the River Lee (Table 12).

Table 2 - Total Sea Trout (over 40 cm ) Catch 2001-2009

| Year | Drift | Draft | Other Engine | Adjusted Angling <br> Harvest | Total Harvest | \% change on <br> previous year |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2001 | 1,787 | 2,192 | 246 | 1,066 | 5,291 |  |
| 2002 | 874 | 1,083 | 126 | 1,464 | 3,547 | $-33 \%$ |
| 2003 | 712 | 1,024 | 203 | 997 | 2,936 | $-17 \%$ |
| 2004 | 640 | 929 | 78 | 519 | 2,166 | $-26 \%$ |
| 2005 | 279 | 535 | 50 | 770 | 1,634 | $-25 \%$ |
| 2006 | 116 | 311 | 47 | 543 | 1,017 | $-38 \%$ |
| 2007 | N/A | 34 | N/A | 331 | 365 | $-64 \%$ |
| 2008 | N/A | 59 | N/A | 448 | 507 | $+38.90 \%$ |
| 2009 | N/A | 35 | 10 | 455 | 500 | $-1.4 \%$ |

Table 2 shows the summary statistics for sea trout harvest for all engines including rod and line for 2001-2009. Angling figures shown represent the adjusted sea trout harvest. Also presented are the percentage change on previous years.

The total harvest for all sectors in 2001 was 5,291 sea trout (over 40 cm ). By 2009, this had fallen to 500 sea trout, a drop of $c .90 .55 \%$ (Table 13).

Fig. 2. Total sea trout (over 40cm) harvest 2001-2009.

For 2009, anglers took $91 \%$ of total sea trout, draft nets account for $7 \%$ and other engines (Snap nets accounted for $2 \%$ (Table 13). $32.3 \%$ of the 2009 total sea trout harvest was taken on L. Currane, Co. Kerry, $10.3 \%$ on the River Slaney, Co. Wexford, and $7.9 \%$ on the River Laune (Table 13).

## Chapter 2

Summary Commercial Catch Statistics
2001-2009

Table 3-Commercial Salmon and Sea Trout (over 40 cm) Catch 2001-2009

| Year | TAC | Total Reported Harvest | \% below TAC |
| :---: | :---: | :---: | :---: |
| $\mathbf{2 0 0 1}$ | - | 237,626 |  |
| 2002 | 219,649 | 208,982 | $4.9 \%$ |
| 2003 | 182,000 | 168,819 | $7.2 \%$ |
| 2004 | 161,951 | 145,253 | $10.3 \%$ |
| 2005 | 139,900 | 122,044 | $12.8 \%$ |
| 2006 | 91,367 | 86,650 | $5.2 \%$ |
| 2007 | 17,305 | 8,877 | $48.7 \%$ |
| 2008 | 17,314 | 8,962 | $48.2 \%$ |
| 2009 | 18,211 | 6,802 | $62.65 \%$ |

Table 3 shows the Total Allowable Catch (TAC) of salmon and sea trout (over 40 cm ) provided for in the commercial sector in 2009 was 18,211. The total reported harvest of 6,802 was $c .62 .65 \%$ below the TAC (Table 16).

Fig 3. Total Allowable Catch (TAC) and Total Reported Commercial Catch 2002-2009.

In 2009, the TAC was allocated on an individual river basis and no distinction was made between commercial and angling fisheries. The district fisheries committee in each Regional Fisheries Board allocated the identified surplus for each river between the commercial and angling fishery as appropriate. The figure of 18,211 above for 2009 is the TAC for commercial fishery and is the sum of the individual river quotas allocated by each district fishery committee. Some fisheries had no draft net fishery in which case the full TAC was allocated to angling.

## Commercial Salmon Catch 2009

In the 2009 commercial salmon harvest, $91.5 \%$ of salmon were taken by draft nets and $8.5 \%$ by snap nets (Table 14). The total commercial salmon harvest in 2009 was 6,757.

The biggest landings of salmon in 2009 are presented in the following table (Table 4):
Table 4 - Top 4 Commercial Fisheries in 2009

| 2009 |  |  |  |
| :---: | :---: | :---: | :---: |
| District | River | No. of <br> Salmon <br> Harvested | \% of National <br> Harvest |
| Kerry | Laune | 1,620 | $24 \%$ |
| Limerick | Feale | 1,252 | $18.5 \%$ |
| Cork | Lee | 1,182 | $17.5 \%$ |
| Bangor | Owenmore | 674 | $10 \%$ |

Table 4 shows a summary of the top 4 rivers where salmon were caught by commercial fishermen in 2009 (refer to table 14 for a full breakdown).

## Commercial Salmon Catch Disposals

The table below shows the 2009 commercial salmon catch disposals:
Table 5-Commercial Salmon Catch Disposals

| Commercial Salmon Catch Disposals 2009 |  |
| :--- | :---: |
| Disposal Type | Commercial Nets <br> (\% total sales) |
| Domestic Consumption | $16.9 \%$ |
| Guesthouse / B\&B | $0.3 \%$ |
| Hotel | $0.3 \%$ |
| Licensed Salmon Dealers | $45.6 \%$ |
| Private Sales | $34.9 \%$ |
| Restaurant | $1.5 \%$ |
| Unknown | $0.5 \%$ |

Table 5 shows the summary of commercial salmon catch disposals 2009.
A more detailed analysis can be obtained from Table 18.

## Commercial Sea Trout (over 40 cm) Catch 2009

In the 2009 commercial sea trout harvest, $77.78 \%$ of sea trout were taken by draft nets and $22.22 \%$ by snap nets. The total commercial sea trout (over 40 cm ) harvest in 2009 was 45 . Sea trout catches were highest in the River Nore at $c .22 .2 \%$ of the national catch (Table 15).

The proportion of sea trout in the national commercial catch of salmon and sea trout in 2009 was $0.66 \%$, down from 2\% in 2001 (Table 16).

## Chapter 3

Summary Angling Catch Statistics 2001-2009

## Angling Salmon Catch 2001-2009

Table 6-Salmon Angling Harvest 2001-2009

| Year | Reported Salmon <br> Caught \& Tagged | Adjusted Salmon <br> Caught \& Tagged | \% change <br> on previous year |
| :---: | :---: | :---: | :---: |
| $\mathbf{2 0 0 1}$ | 18,163 | 26,074 |  |
| 2002 | 22,900 | 29,408 | $+12.8 \%$ |
| 2003 | 16,933 | 20,888 | $-29.0 \%$ |
| 2004 | 21,192 | 26,202 | $+25.4 \%$ |
| 2005 | 18,582 | 22,361 | $-14.7 \%$ |
| 2006 | 19,610 | 22,485 | $+0.6 \%$ |
| 2007 | 16,533 | 19,430 | $-13.6 \%$ |
| 2008 | 19,480 | 22,215 | $+14.33 \%$ |
| 2009 | 15,223 | 17,521 | $-21.13 \%$ |

Table 6 shows the summary statistics for salmon harvest by rod and line for 2001-2009. Also presented are the percentage change on previous years.

The total reported number of salmon harvest by rod and line in 2009 was 15,223 . This was adjusted to 17,521 (Table 23) to account for those fish which were harvested for which no logbook was returned (Small, 1991). This represents a decrease of $21.13 \%$ on the 2008 salmon angling harvest.

The total reported salmon caught and released by rod and line in 2009 was 10,265 (Table 7). These figures are based on the reported catch only and are not adjusted to account for those fish which were caught and for which no logbook was returned. Therefore the total reported salmon caught by rod and line was 25,488.

Table 7-Salmon Angling Catch 2001-2009

| Year | Reported Salmon <br> Harvest | Reported Salmon <br> Caught \& Released | Total Reported <br> Salmon Catch <br> by rod \& line | \% change <br> on previous year |
| :---: | :---: | :---: | :---: | :---: |
| $\mathbf{2 0 0 1}$ | 18,163 | $\mathrm{n} / \mathrm{a}$ | $\mathrm{n} / \mathrm{a}$ | $\mathrm{n} / \mathrm{a}$ |
| 2002 | 22,900 | $\mathrm{n} / \mathrm{a}$ | $\mathrm{n} / \mathrm{a}$ | $\mathrm{n} / \mathrm{a}$ |
| 2003 | 16,933 | $\mathrm{n} / \mathrm{a}$ | $\mathrm{n} / \mathrm{a}$ | $\mathrm{n} / \mathrm{a}$ |
| 2004 | 21,192 | 2,091 | 23,283 | $\mathrm{n} / \mathrm{a}$ |
| 2005 | 18,582 | 2,553 | 21,135 | $-9.23 \%$ |
| 2006 | 19,610 | 5,409 | 25,019 | $+18.38 \%$ |
| 2007 | 16,533 | 13,000 | 29,533 | $+18.04 \%$ |
| 2008 | 19,480 | 11,977 | 31,457 | $+6.51 \%$ |
| 2009 | 15,223 | 10,265 | 25,488 | $-18.98 \%$ |

Table 7 shows the summary statistics for total reported salmon caught by rod and line for 2001 2009. Angling figures shown are the reported salmon catch taken from anglers logbooks. Also presented are the percentage change on previous years.

## Angling Sea Trout (over 40 cm) Catch 2001-2009

The total reported sea trout (over 40 cm ) harvest in 2009 was 416 (Table 25). This was adjusted to 455 sea trout to account for those fish which were harvested and for which no logbook was returned (Small, 1991). This represents a $1.56 \%$ increase on the 2008 angling harvest for sea trout (over 40 cm ).

Table 8-Sea Trout Angling Harvest 2001-2009

| Year | Adjusted Sea Trout <br> Harvest | \% change <br> on previous year |
| :---: | :---: | :---: |
| 2001 | 1066 |  |
| 2002 | 1464 | $+37.3 \%$ |
| 2003 | 997 | $-31.9 \%$ |
| 2004 | 519 | $-47.9 \%$ |
| 2005 | 770 | $+48.4 \%$ |
| 2006 | 543 | $-29.5 \%$ |
| 2007 | 331 | $-39.05 \%$ |
| 2008 | 448 | $+35.34 \%$ |
| 2009 | 455 | $+1.56 \%$ |

Table 8 shows the summary statistics for sea trout harvest by rod and line for 2001-2009. Angling figures shown represent the adjusted sea trout harvest.

Also presented are the percentage change on previous years.

## Angling Licences Sold and Logbooks Returned 2001-2009

18,314 salmon rod licences were sold in 2009, a decrease of $8.71 \%$ on 2008 licence sales (Tables 20-22). Anglers returned 12,890 logbooks to the Regional Fisheries Boards in 2009, with a national return rate of $70 \%$, up $1 \%$ on 2008 logbook returns (Tables 19).

Table 9-Salmon and Sea Trout Licence sales 2001-2009

| Year | Licences Sold | Logbooks Returned | \% Return |
| :---: | :---: | :---: | :---: |
| $\mathbf{2 0 0 1}$ | 32,814 | 14,238 | $43 \%$ |
| $\mathbf{2 0 0 2}$ | 35,024 | 18,116 | $52 \%$ |
| $\mathbf{2 0 0 3}$ | 31,809 | 18,088 | $57 \%$ |
| $\mathbf{2 0 0 4}$ | 30,807 | 17,955 | $58 \%$ |
| $\mathbf{2 0 0 5}$ | 28,738 | 17,682 | $62 \%$ |
| $\mathbf{2 0 0 6}$ | 27,341 | 18,554 | $68 \%$ |
| $\mathbf{2 0 0 7}$ | 19,986 | 12,962 | $65 \%$ |
| 2008 | 20,061 | 13,917 | $69 \%$ |
| $\mathbf{2 0 0 9}$ | 18,314 | 12,890 | $70 \%$ |

Table 9 shows the summary statistics for the total numbers of rod licences sold from 2001-2009 and the numbers and percentage of logbooks returned by salmon anglers.

## Salmon Angling Catch 2009

Over one quarter of all salmon nationally (28.9\%) were harvest on the River Moy System, which had a reported catch of 4,001 salmon. This was adjusted to 5,061 salmon to account for those fish which were harvested and for which no logbook was returned (Table 23). Salmon were harvested at 57 rivers and locations in 2009. The top three salmon producing water systems made up half (50.6\%) of the national harvest by rod and line in 2009.

## Sea Trout (over 40 cm) Angling Catch 2009

$35.5 \%$ of sea trout harvest and retained by rod and line were taken on Lough Currane/Waterville (Table 25) with a reported harvest of 151 sea trout (over 40 cm ). This was adjusted to 161 sea trout to account for those fish which were harvested and for which no logbook was returned.

## Catch per Angler

An analysis of the distribution of the salmon catch indicated that 5,538 anglers harvested (tagged) salmon in 2009 (Table 58), a decrease of $7.73 \%$ on 2008. 2,105 anglers caught and released salmon in 2009 (Table 57) a decrease of $11.14 \%$ on 2008. These figures are based only on those anglers who returned logbooks.

## Catch and Release Estimates

Based on logbook returns to the Regional Fisheries Boards, catch and release estimates were compiled for 2009. A total of 10,265 salmon are reported as having been caught and released (Table 24) across all regions and 15,223 salmon (Table 24) are reported as having been harvested. The total reported catch of both harvested and caught and released salmon is 25,488 giving a national catch and release rate of $40 \%$. This is an increase of $2 \%$ on the 2008 figure.
$16.36 \%$ of all salmon caught and released, were released on the River Suir (Table 26) which had a reported catch and release of 1,679 salmon. The River Nore accounted for $12.33 \%$ of all salmon caught and released and the River Blackwater (Munster) accounted for $11.81 \%$ of all salmon caught and released. Salmon were caught and released on 65 rivers and locations in 2009. The top four rivers where salmon were caught and released made up almost half ( $49.85 \%$ ) of the national catch and release by rod and line in 2009 (Table 26).

Table 10-Reported Salmon Released 2001-2009

| Year | Reported Salmon <br> Caught \& Released | \% change <br> on previous year |
| :---: | :---: | :---: |
| 2001 | $\mathrm{n} / \mathrm{a}$ | $\mathrm{n} / \mathrm{a}$ |
| 2002 | $\mathrm{n} / \mathrm{a}$ | $\mathrm{n} / \mathrm{a}$ |
| 2003 | $\mathrm{n} / \mathrm{a}$ | $\mathrm{n} / \mathrm{a}$ |
| 2004 | 2,091 | $\mathrm{n} / \mathrm{a}$ |
| 2005 | 2,553 | $+22.13 \%$ |
| 2006 | 5,409 | $+111.95 \%$ |
| 2007 | 13,000 | $+140.34 \%$ |
| 2008 | 11,977 | $-7.87 \%$ |
| 2009 | 10,265 | $-14.29 \%$ |

Table 10 shows the summary statistics for salmon caught and released by rod and line for 20042009 as determined from angling logbooks. Also presented are the percentage change on previous years.

## Angling Catch of Spring Salmon

An assessment on the number of salmon caught between $1^{\text {st }}$ January 2009 and $31^{\text {st }}$ May 2009 was made to estimate the number of spring (or multi-sea winter) salmon being taken by rod and line (Table 28). The adjusted catch indicates that a total of 4,675 spring salmon were caught in 2009, of which 1,610 were released and 3,065 harvested. The figure of 3,065 harvested spring salmon represents $c .17 .5 \%$ of the total adjusted harvest ( 17,521 spring fish and grilse). A total of 739 spring fish were caught on the River Moy system and 478 spring fish for the Ballysadare River in 2009 (Table 28).

## Angler Nationality

Anglers from 46 different countries held salmon and sea trout rod licences in 2009. 66\% of anglers were from Ireland, 11\% from Northern Ireland, 10\% from Great Britain (England, Scotland and Wales), 4\% from France and 3\% from Germany (Table 21-22).

Table 11 - Summary Angler Nationality 2008-2009

|  | Nationality | 2008 | 2009 | \% change on previous year |
| :---: | :--- | :---: | :---: | :---: |
| $\mathbf{1}$ | Ireland | 12,402 | 12,138 | $-2.13 \%$ |
| $\mathbf{2}$ | Great Britain | 2,736 | 1,900 | $-30.56 \%$ |
| $\mathbf{3}$ | Northern Ireland | 2,415 | 2,028 | $-16.03 \%$ |
| $\mathbf{4}$ | France | 668 | 674 | $0.89 \%$ |
| $\mathbf{5}$ | Germany | 536 | 469 | $-12.50 \%$ |
| $\mathbf{6}$ | USA | 207 | 207 | $0.00 \%$ |

Table 11 shows a comparison of the top 6 angler nationalities for 2008 and 2009

## Angling Catch by Month and Capture Method

The reported salmon angling catch by month and capture method for the top salmon producing rivers systems in 2009, namely the Moy, the Blackwater (Munster), Suir, Corrib, Nore, Mulkear (Shannon), Feale, Ballysadare, Laune, Drowes, Lee, Owenmore, Bandon, Fane, Owenea, Delphi, Duff, Boyne, Easkey, Owenduff, Maine/Brownflesk, Currane, Roughty, Eany, Caragh, Ilen, Crana, Glen, Bonet, Gweebarra, Inny and Erriff, are presented in Fig 7- Fig 38.

Table 29 shows the reported salmon and sea trout harvest provided for by rod and line in 2009 as indicated in the logbooks and the adjusted harvest to account for those fish captured but for which no logbook was returned. The method for adjusting the rod catch follows investigations published by Small (1991). The TAC achieved per river is also presented; the surplus harvest from the commercial catch was transferred to anglers in those rivers which exceeded the total allowable catch.

Tables 30-33 show the reported number of salmon and sea trout (over 40 cm ) harvested as well as those caught and released by rod and line in the Eastern Regional Fisheries Board area in 2009 as determined from angling logbook returns. The tables also shows the adjusted catch to take into account those fish captured for which no logbook was returned. River names and codes are defined by the Ordnance Survey of Ireland, Rivers and their Catchment Basins, 1958.

Tables 38-41 show the reported number of salmon and sea trout (over 40 cm ) harvested as well as those caught and released by rod and line in the South Western Regional Fisheries Board area in 2009 as determined from angling logbook returns. The tables also shows the adjusted catch to take into account those fish captured for which no logbook was returned. River names and codes are defined by the Ordnance Survey of Ireland, Rivers and their Catchment Basins, 1958.

## Appendix iv

## Glossary of Terms used in Report

## "Regional Fisheries Boards" and "Fishery Districts"

There are seven Regional Fisheries Boards and 17 fishery districts. The Regional Fisheries Boards are made up of fishery districts as follows;

| Regional Fisheries Board | Fishery District |
| :---: | :---: |
| Eastern Regional Fisheries Board (ERFB) | Dundalk |
|  | Drogheda |
|  | Dublin |
|  | Wexford |
| Southern Regional Fisheries Board (SRFB) | Waterford |
|  | Lismore |
| South Western Regional Fisheries Board (SWRFB) | Cork |
|  | Kerry |
| Shannon Regional Fisheries Board (ShRFB) | Limerick |
| Western Regional Fisheries Board (WRFB) | Galway |
|  | Connemara |
|  | Ballinakill |
| North Western Regional Fisheries Board (NWRFB) | Bangor |
|  | Ballinakill |
|  | Sligo |
| Northern Regional Fisheries Board (NRFB) | Ballyshannon |
|  | Letterkenny |

Logbook means a salmon and sea trout commercial fishing logbook or a salmon and sea trout angler's logbook. The logbook will be issued along with a salmon and sea trout commercial and/or anglers licence. The logbook must be completed by the licence holder The licence holder must populate the logbook with his/her fishing effort for salmon and sea trout including days fished where there was no catch.

## Logbook Returns

Completed Logbooks are returned to the regional fisheries board which issued the licence not later than $21^{\text {st }}$ August for commercial fishing logbooks and no later than $19^{\text {th }}$ October for angler's logbooks of the year to which they relate.

## Harvest

This is the number of salmon and/or sea trout "caught and retained", "caught and tagged", "caught and killed". All commercially caught salmon and/or sea trout are harvested.

## Caught and Tagged

This is the number of salmon and/or sea trout "caught and retained", "caught and killed". All harvested salmon are tagged.

## Caught and Released

This is the number of salmon and/or sea trout caught by rod and line in specified waters, handled carefully and immediately returned alive to those waters.

## Reported

This is the actual salmon or sea trout catch taken directly from angler's logbook.

## Adjusted

The assessment of wild salmon and sea trout angling catches includes an adjustment to the reported catch to take into account the numbers of fish caught by anglers who have not returned their logbook.

## Small

The method for adjusting the reported catch follows investigations published by Small (1991).

## Raising Factor

The Wild Salmon and Sea Trout statistics are generated based on the logbook returns obtained from recreational salmon and sea trout anglers. The reported catches taken from logbooks are raised to provide an adjusted catch to take account of those anglers who did not return logbooks. This reported catch is multiplied by a raising factor which is obtained based on a formula $((0.3 / X)+0.7)$ called Small 1991. X represents the total licence sales divided by the total logbooks returned by anglers.

Spring Salmon - Salmon which are caught between $1^{\text {st }}$ January and $31^{\text {st }}$ May.
Returning from the sea after spending two or more years, 2 sea-winter or multi-sea winter salmon. These older fish are larger and usually return in the springtime and are often referred to as spring salmon.

## Draft Net

Draft Net includes a single wall of netting attached to a floating head rope and a weighted ground rope, designed so that a bag is formed into which the catch is drafted or hauled, for the purpose of taking or fishing for, or attempting to take or fish for, salmon or sea trout.

## Drift Net

Drift Net includes a single sheet of netting attached to a floating head rope and a weighted ground rope, designed to drift freely at the surface of waters for the purpose of taking or fishing for, or attempting to take or to fish for, salmon or sea trout, to which net or ropes no weights or anchoring devices are attached which in any way hinder or prevent the free movement of the net in those waters.

## Other Fishing Engine

Other fishing engine - means any fishing engine not being a drift net, a draft net, a snap net or rod and line, capable of being used for the purpose of taking or fishing for, or attempting to take or to fish for, salmon or sea trout.

## Total Allowable Catch (TAC)

The maximum number of gill tags that may be issued, in respect of wild salmon and sea trout which may be lawfully taken, by the holders of fishing licences, in a river of a fishery district.

## Salmon and Sea Trout Anglers Licence

A licence - Annual licence, entitles you to fish in all 17 districts (excluding the Foyle area) in which rivers are open for fishing for the duration of the season.
B licence - A district licence entitles you to fish in one specified district only (excluding the Foyle area) in which rivers are open for fishing for the duration of the season.
P licence - A juvenile licence entitles you to fish in all 17 districts (excluding the Foyle area) in which rivers are open for fishing for the duration of the season.
$R$ licence - A twenty one day licence, entitles you to fish in all 17 districts (excluding the Foyle area) in which rivers are open for fishing.
S licence - A one day licence entitles you to fish in all 17 districts (excluding the Foyle area) in which rivers are open for fishing.
W licence - A special local licence for selected waters
X licence - Foyle Area extension licence -
(additional permit may be required in association with a state licence for certain lakes/rivers)

## River System Number

River names and code numbers are as per the Ordnance Survey of Ireland, Rivers and their Catchment Basins, 1958.

[^0]:    ${ }^{1}$ Open for sea trout under 40 cm from 1st July with a daily bag limit of 2 sea trout
    ${ }^{2}$ Open for catch and release for Jan only.

[^1]:    ${ }^{3}$ Open for sea trout under 40 cm from 1st July with a daily bag limit of 2 sea trout
